

Ecole Nationale de l'Aviation Civile

[Continuing Education](#)

Applying expertise from its activities in initial education and research, for over 20 years ENAC has developed a varied professional development service. The extent and interest of advanced training courses, adaptation programmes and qualifications offered to engineers, supervisors and technicians from the aeronautical industry allow ENAC to be the leading professional development provider in the aeronautical sector.

TRAINAIR PLUS

Alliance of technical and teaching skills

Courses offered are based on recognized educational standards such as [Trainair Plus program ///](#)

One of ENAC's strengths resides in the synergy between technical experts responsible for accurate information and educational psychologist learning "facilitators". Since 2nd December 2014, ENAC has been Regional Centre for Excellence of ICAO Trainair Plus program.

A comprehensive and specific range

ENAC professional development activities are naturally developed in areas where ENAC has been able to acquire and be recognized for specific skills: air traffic, security, safety, monitoring and quality control, electronics, IT, aeronautical techniques, management and education.

Our offer is continually adapted to requirements

ENAC is always eager to better anticipate or respond to the profession's expectations, adapting its training offer, both in terms of content and style. We create new courses arising from new needs and implement customized versions of courses available in the catalogue. All training can be organized in different languages (French, English, Spanish, Arabic, etc.), on or off site and at all required levels.
